Hi there 👋

I received the M.Sc. degree in 2021 from Yonsei University, Seoul, Korea. Currently interested in designing MLOps architecture with IaC especially AWS CDK.

My CV

Aug: Location-based AR SNS

#AWS #CDK #Serverless #Event-driven #IOS #AR

• aug: spacial social

- App Store Link
- Business logics with AWS serverless event-driven architecture.
- Video streaming & image content distribution.
- AWS CDK(IaC) for deploying AWS resources.

MLOps

#AWS #CDK #MLOps #AI #CCTV

• MLOps for AI Surveillance Camera

- Architecture Diagram
- Dataset pipeline using AWS Fathom(co-developing service with SKT)
- o Design & implement train, inference, conversion, deploy pipeline
- Video streaming & image content delievery
- Semantic image search
- AWS CDK(IaC) for deploying AWS resources.

• Radio tower anomaly detection with drone images

- Design serverless architecture for batch inference pipeline.
- AWS CDK(IaC) for deploying AWS resources.

Libuv Game Server

#linux #libuv #C++ #C# #Unity

LibuvGameServer

- On Ubuntu 18.04, using libuv for TCP connection.
- Based on libuv's event loop, Network IO is single threaded.
- [Bug] Segmentation Fault after continuous Disconnection and Connection.

• LibuvGameServerClients

- Dummy Client is based on C# .NET framework
- Client is based on Unity
- o Demo avaiable here

Realtime Pose Estimation with Unity 3D Avatar

BlazePoseWithUnity

o Only has Demo and brief description of project due to confidential rights

Face Detection & Recognition

#Face Recognition #Android #Firebase ML Kit #TensorFlow 2.0 #TensorFlow Lite #Java
#Python

JHFace

- o Face recognition training & testing framework implemented with TensorFlow 2, Keras
- Supported backbones: MobileNet, MobileNetV2, InceptionResNetV2, InceptionV3, ResNet50, ResNet50V2, ResNet101V2, MnasNetA1, MnasNetB1, MnaseNetSmall, NASNetLarge, NASNetMobile, Xception, MobileNetV3Large, MobileNetV3Small, EfficientNetLite0 ~ Lite6, EfficientNetB0 ~ B7
- Supported losses: ArcFace, CosFace

• Android-FaceRecognition

Is runtime face identification on Android device. I used IJB-C dataset for testing labels.

FaceBird

o Is game applicaiton which utilize ML Kit for controlling the bird with rotating Face

Gaze Tracking (Eye Tracking)

#Gaze Tracking #Android #Firebase ML Kit #TensorFlow Lite #PerCom 2021 #GAZEL #Java
#Python

• GAZEL

- Is a Personalized Runtime Mobile Gaze Tracker.
- This work is official implementation of GAZEL framework which is published in PerCom 2021(GAZEL: Runtime Gaze Tracking for Smartphones) .

GazeBird

• Is game application which utilize GAZEL for controlling the bird.

MLKitGazeDataCollectingButton

• Is gaze data collecting application for making gaze estimation model required for GAZEL.

TensorFlow Lite Python

#TensorFlow Lite #Python #Interpreter

- Works on TensorFlow Lite Python Interpreter.
 - Based on: https://www.tensorflow.org/lite/examples, converted Android Java(Kotlin) code to Python
 - TFLitePoseEstimation
 - TFLiteDetection

- TFLiteClassification
- TFLiteSegmentation

Power Management

#Mobile #PM #flask #svm #dark mode

- ► Works on optimizing Mobile device battery
- ► Works used to log iBeacons

Visualization on Web-browser

#HighCharts.js #Go.js #flask #csv #Web browser

► Visualizing Charts
